PROFILE

Seeking an internship position in software development to apply and enhance my programming and UX/UI design skills while gaining practical experience in a professional environment. I aim to contribute to the success of the organization through innovative solutions and a strong commitment to learning and collaboration

PROJECTS

Coffee Drink Ordering System (C#)
- Developed a system to manage drink orders with features for selecting multiple drinks, calculating total amounts, and performing transactions such as adding, deleting, and editing.

Database Management System (C#)
- Designed a system for managing admins, customers, and food/beverage menus. Features include search, add, delete, and edit functions, with data stored securely in the database.

Clothing Sales Application (Java)
- Built an application for clothing sales, enabling users to select items, add or delete items, edit the menu, and calculate total amounts.

Database Management Application (PHP)
- Created an application for managing admin and customer data with functionalities to add, delete, and edit records.
